Summary

Results-driven full stack web developer with 2+ years of experience. Proficient in JavaScript/TypeScript with expertise in React, Next.js, Express, and Nest.js. Skilled in PHP and Laravel, and databases: PostgreSQL, MongoDB... Committed to delivering high-quality, efficient web solutions. Eager to continue learning and contribute to project success.

Professional Experience

Full-Stack Developer - (Litidea)

September 2023 - present

- Led frontend and backend development efforts for a small enterprise.
- Designed and implemented robust systems and databases.
- Collaborated closely with colleagues to deliver tailored solutions.
- Led the design and development of a startup app "Wareed" for healthcare and doctors' appointments.

Web Developer Internship - (University Of M'Hamed Bouguerra)

Jun 2022 - July 2023

- Led the development of a web application aimed at automating student registration and orientation processes, alleviating administrative burdens and eliminating the need for in-person registration.
- Implemented features allowing students to register and receive orientation based on their data, while administrators could manage department-specific student types, calculate and sort students by grades, and automatically assign major domains for master students.
- Implemented secure authentication and optimized database queries for efficient data management.
- Drove impactful results with the successful registration and submission of over 20,000 student applications, optimizing candidate processing and orientation procedures for more than 30 departments and faculties. appointments.

Web Designer - (Freelance)

2020 - 2022

- Designed and developed user interfaces and landing pages for small businesses and startups.
- Created visually appealing and intuitive designs to enhance user engagement and conversion rates using Figma.
- Utilized HTML, CSS, and JavaScript to implement responsive and accessible web designs.
- Collaborated closely with clients to understand their brand identity and requirements.

Projects

Dasezo Portfolio

Next.js, Tailwind CSS, MDX

- Developed a personal portfolio website using Next.js, Tailwind CSS, and MDX for blog posts. Designed and implemented the website layout and components. Integrated MDX for managing and displaying blog posts. Ensured responsiveness and accessibility across various devices. Implemented SEO optimizations for better visibility.

Wareed App

JavaScript, React Native, ExpressJs

- Led the development of a web and mobile application for managing medical appointments and records. Designed the interface for the mobile application to ensure a seamless user experience. Developed the application using React Native 'Expo' framework. Established connectivity between the application and Express backend using REST API.

UBins Platform

JavaScript, PHP, MySQL

- Developed a web application aimed at streamlining Master degree candidate registrations, submissions management, and orientations. Designed the database architecture for efficient data storage and retrieval. Built the backend using PHP with MVC architecture and MySQL for data management. Successfully deployed the application to the Apache server for production use.

Education

Professional Bachelor Degree in Web Development

University Of M'Hamed Bouguerra 2023

- Studied computer science with a specific focus on web development, learning to design user experiences and interfaces. Acquired skills in designing systems and databases, while gaining proficiency in various programming languages and frameworks. Also, learned software development cycles, including project management, and completed a project each semester to apply theoretical knowledge to practical scenarios.
